- ✓ Technology focus and innovation as the fundamental principle behind our service delivery
- ➤ **Client Testimony**
- ➤ *"The SOC engagement with Fortidm was a great success. We were able to achieve all the deliverables in the time frame and budget agreed to. The high quality of the work was exemplified by the outstanding summary report. The summary report was "Executive Ready" allowing us to immediately socialize the findings with the management team and quickly establish the next steps. We were able to manage our teams and ensure the outcome and expectations were clear and understood. We have awarded few other projects based on the past success with Fortidm. We look forward to our continued partnership with Fortidm Technologies"*
  *RO - **Director Information Security & Architecture, Synacor Inc.***

Mr. Hariram Hari PMP is the president and founder has 20 years of experience in IT systems integration and enterprise program management. Hari was involved in a variety of business verticals such as supply chain startup (visionary all through final successful implementation and client rollout), financial SOX implementation consulting with big 4, and government technology and management. As a system integration program manager, he has managed large teams with budgets over $100 million successfully in public and private sectors, rolling out large-scale data center IT infrastructure projects, business application services and IT security projects. Hari holds a master's degree in chemical engineering (with a specialization in computer-aided simulation and modeling) from the Indian Institute of Technology, Chennai, India.
